• <http://felipe.pena.cl>

SUMMARY

Felipe Peña is the CEO and founder of Mindscore. He has a computer science engineer degree and wide experience regarding web and mobile projects and technologies, particularly working with startups and new companies in New York. He also has deep studies in piano and music theory, which is why he is involved in the music field with more than 10 years of experience in bands and participating in music creation and distribution processes. From 2010, he has been involved in many entrepreneur groups and meetup events in Chile and since may 2011 he is the lead organizer of a late co-working group called Santiago Nightowls (meet up group created in New York), where entrepreneurs come together to work in side projects and help each other. Currently with Mindscore, he has got public and private funding and support from chilean government seed capital program "Capital Semilla" (CORFO) and from Telefonica's accelerator, Wayra in its first generation of startups. This has enabled him to build up a company and create a business around his two passions (music and technology). He has also appeared in various written and digital press media related to entrepreneurship and startup news.

SKILLS

- Web Development
- Web Applications
- JavaScript
- Java
- Online Marketing
- PHP
- Mobile Applications
- CSS

EXPERIENCE

Wizdom Music

01 / 2012 - Present

Partner, Developer

EarWizard trains your ear while improving your memory skills. Repeat back a sequence of chords which gets longer with each round of play. As you improve your skills, the visuals disappear and you will have to depend on your EAR! Start off in EASY mode with only a few chords on screen and with practice, you will ultimately reach the hardest level where you will have seven chords on screen and be playing against the clock!

Mindscore

12 / 2010 - Present

Founder, CEO

Mindscore is a music composition cross-platform application meant for amateur and professional musicians. It offers various tools to create music scores and sharing them afterwards with your friends or bandmates. We're soon releasing a beta service, so people can sign in and track their music scores uploaded through our mobile applications. Meanwhile, you can follow us on Twitter (www.twitter.com/mindscoreapp) or like us on Facebook (www.facebook.com/mindscore)

Aftermath.vc

11 / 2010 - 06 / 2012
